**CARIBBEAN
BLINDS** UK LTD

UK MANUFACTURERS OF INNOVATIVE EXTERIOR BLINDS

CELEBRATING 30 YEARS OF SHADING THE NATION | 1987 - 2017

Designed, engineered and built to last, Caribbean Blinds UK manufacture and supply the *very finest external shading systems*, that offer a superior specification to any other on the market, with numerous cutting edge design features and technology, along with added lifestyle and energy saving benefits.

For reassurance and peace of mind all products meet stringent European quality & safety standards and come backed with a fully comprehensive guarantee.

Award winning
OUTDOOR LIVING POD™

Make the most of your Home & Garden

with innovative External Shading from Caribbean Blinds

PATIO AWNINGS

Providing a stylish roof over your terrace, our retractable patio awnings keep you, your family and friends cool in the sun, protected from harmful UV rays and bright light, along with providing much needed shelter from those occasional rain showers*, whilst adding an eye catching striking new dimension to the façade.

P. 4-7

** pitch of 14 degrees or greater required for rain shower run off*

OUTDOOR LIVING POD™

Sun, wind, rain or even snow, our opening and closing louvered roof pergola canopy complete with optional integrated screens to the sides provides protection whatever the weather, turning your terrace into an extension of your property, an alfresco outdoor - indoor living space that can truly be used all year round.

P. 8-9

EXTERNAL BLINDS

Creating a physical barrier in front of and stopping the sun's energy even striking the glazing, our external roof blinds and roller blinds are the most effective way to prevent excessive solar heat gain, along with diffusing incoming light to eliminate glare, all whilst keeping the view and connection out.

P. 10-11

External blinds can **block upto 96% of the sun's incoming solar heat rays**, which in turn can **reduce interior room temperatures by more than 10 degrees centigrade** on even the hottest of summer days and cut the energy consumption otherwise needed to cool down a hot room by more than 80%.

Sun when you want it, **Shade & Shelter** when you

STREAMLINE DESIGN

▼ BAHAMAS AWNING

BAHAMAS & CUBA AWNING

The Bahamas and Cuba model awnings are the *crème de la crème* of the Caribbean range. Their unique design and slim measurements make them suitable for virtually every application making them the universal choice.

Both awnings are built round a substantial extruded aluminium backplate which offers for multiple brackets and fixing points to be positioned across the width ensuring a sound installation to any structure, along with allowing the awnings to span large widths upto 7m in a single unit or 14m as a coupled unit.

Powerful twin spring loaded folding arms tensioned via quadruple hi-tensile tear resistant stainless steel sheathed cables ensure optimum fabric tension at every position, able to withstand windspeeds upto Beaufort 6* and project upto 3.75m out.

The full cassette casings with rounded edges on the Bahamas awning for the classic, elegant look or squared edges on the Cuba awning providing a contemporary, modern look, protect the fabric and operating mechanism from inclement weather when retracted away along with providing a neat hideaway for the awning.

Operation is effortless thanks to the built in tubular motor contained inside the cassette casing, operated from a remote control or wirefree wall switch. Optional sensors including light & wind allow for automatic functioning of the awning, extending the awning when set light levels are reached and retracting the awning if strong winds pose a danger. *Manual operation through a gearbox and detachable crank handle is available for smaller sized awnings.*

Choose from an endless array of premium solution dyed acrylic fabrics each treated with an invisible nano technology coating that generates a self clean effect.

Optional dimmable LED lighting mounted to the underside of the cassette casing and infra-red ultra low glare heaters enable all year round use and enjoyment from the terrace.

TORTOLA AWNING MOUNTED FACE FIX

TORTOLA AWNING MOUNTED ON BESPOKE CANTILEVER BRACKETS

need it

TORTOLA & ANGUILLA AWNING

The streamline cylindrical shape of the Tortola and Anguilla model awnings make them ideal where mounting space is limited such as bungalows and single storey extensions.

Both awnings are built round heavy duty extruded aluminium blocks to each end, which can be either face fixed to the façade or top fixed to an overhang such as a soffit. A fully adjustable pitch from as little as 0 degrees upto a maximum of 45 degrees ensures the optimum angle can be achieved.

Twin cable, twin spring tensioned folding arms ensure the fabric is kept taut at every position, whilst the cassette casing neatly hides the awning away when retracted and protects the mechanism and fabric from inclement weather.

The only difference in design is the fabric barrel on the Anguilla awning is visible when the awning is open, whereas on the Tortola awning it is discreetly hidden behind an aluminium cover profile.

Manual operation through a gear box and detachable crank handle is standard on the awnings, whilst optional motorised operation through a built in tubular motor functioned from a remote control or wirefree wall switch enables effortless control.

A large selection of plain, block and striped fabrics, woven using premium quality solution dyed acrylic yarns are available, all featuring an easy clean coating and offering exceptional colour luminosity.

Able to span widths upto 5m* and with projections ranging from 1.5m upto 3m*, these awnings are ideal for the majority of residential applications offering great looks and value for money.

* maximum dimensions detailed are for the Tortola awning, the Anguilla awning has a maximum width of 4m and projection of 2.5m

The garden room with a

ROOF OPEN

ROOF CLOSED

OUTDOOR LIVING POD™

CLASSIC & DELUXE ROTATE

From closed roof to open at the touch of a button, the Classic & Deluxe Rotate versions of the Outdoor Living Pod™ pergola provide a flexible, adaptable, **all weather living space** to your terrace or in your garden.

Boasting an all aluminium corrosion resistant construction that is highly durable and easy to maintain the Outdoor Living Pod™ can withstand the harshest of weather conditions, designed to last a lifetime.

The sleek extruded aluminium roof louvers rotate anticlockwise through 150 degrees to provide **precise sun control** along with ventilation from heat build up beneath.

When closed the roof louvers lock together and are 100% water, wind and snow tight.

Optional screens to the sides of our Deluxe Outdoor Living Pod™, integrated in the cross beams, lower to provide shade from low level sunlight whilst also providing protection from breezes & showers along with giving added privacy.

Additionally warm white dimmable LED light strips can be incorporated in the roof louvers to provide ambient evening lighting and ultra low glare infra-red radiant heating can be fitted to the cross beams to provide instant warmth.

The Outdoor Living Pod™ including all options are effortlessly operated from a stylish remote control, which can also control garden lights and water features for added convenience.

* maximum dimensions shown are for Deluxe version, Classic version available upto 6m x 4m

ANTIGUAN EXTERNAL ROLLER BLIND

Featuring a unique locking mechanism contained within the side channels, which keeps the fabric held in place at every position, not only do our external roller blinds offer unbeatable solar heat and light protection but are windproof* too.

A built in tubular motor, housed in the cassette headbox that protects the fabric and operating mechanism when closed away provides easy functioning from a remote control or wall switch, with the option of adding a light sensor to automatically lower the blind to prevent overheating whilst you are out.

An array of PVC free dimout (mesh) fabrics are available that maintain the view through** or solid non perforated materials are available for complete blackout, all treated with wipe clean coatings for easy maintenance.

* maximum windspeed Beaufort 6
** daytime only

▲ Typical view through the unique micro perforated fabrics available on our external roller blinds on a sunny day

ST. LUCIA SKYLIGHT BLIND

Using the windproof locking mechanism technology of the Antiguan roller blind and tensioning system of the roof blind, this unique blind is perfect for fixed skylights measuring upto 3m square.

CAYMAN EXTERNAL ROOF BLIND

Mounted to the top of glazed roofs including conservatories and rooflights the Cayman external blind is the natural air conditioning solution that prevents spaces from overheating, along with eradicating glare and providing privacy.

Tensioned via tear resistant dyneema cables that run within the side channels that link to a heavy duty double coiled spring in the leadrail, a taut fabric is guaranteed at every position and allows the blind to be used on any slope roof and in any direction.

The side channels, which attach through height adjustable brackets to the outer glazing bar/frame and support the cassette headbox which contains the fabric and operating mechanism, guide the leadrail ensuring the blind opens and closes smoothly along with running perfectly square.

Convenient touch button operation from a wall mounted or handheld transmitter is standard or add a light & wind sensor for automatic functioning. An endless array of fade & UV resistant dimout and blockout fabrics are available woven from the finest fibres.

of the Cayman
and opening

JAMAICAN WINDOW CANOPY

The traditional external window shading system. Built from a robust lightweight corrosion resistant aluminium framework and covered in the same great range of solution dyed, easy clean acrylic fabrics as our patio awnings, the Jamaican window canopy will stand the test of time and is suited equally to residential and commercial applications.

Able to span widths upto 6m and project out to a maximum of 1.3m, even the largest of glazed areas can be shaded with effortless operation via a one pull cord & pulley system or for ultimate convenience a remote control motor can be fitted.

The valance can be finished with a classic loose wave edge (*as pictured*) or for a more contemporary look choose a straight edge.
